

VISHNU VARDHAN PULLAGURA

[9100652703](tel:9100652703) | Duvvur, Andhra Pradesh | vishnuyadavpullagura@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY:

Computer Science & AI Honours graduate with hands-on experience in AI-powered and full-stack development. Built an NLP-based Answer Evaluation System that reduced manual effort by 60% and a React.js + Node.js Leave Management platform that improved processing efficiency by 50%. Skilled in PyTorch, TensorFlow, Generative AI (RAG, LLMs), and REST APIs. Completed an AI/ML internship and organised a national-level symposium with 1200+ participants.

SKILLS:

- Programming Languages: Python
- AI/ML Frameworks: TensorFlow, PyTorch, Scikit-learn
- Data Science: NumPy, Pandas, Data Visualization, PySpark, Statistical Analysis, Predictive Modeling
- AI Specializations: Deep Learning, Natural Language Processing (NLP), Computer Vision, Generative AI, Retrieval Augmented Generation (RAG), Large Language Models (LLM)
- Web Development: React.js, Tailwind CSS, HTML, CSS, JavaScript
- Cloud & Tools: Google Cloud Platform (GCP), AWS, Git, GitHub, Linux, Jupyter Notebook
- Databases: MySQL, MongoDB

INTERNSHIP:

Data Science Intern - GrowTech (Dr.Reddy's Foundation), Bengaluru	May 2026-Present
• Performed data preprocessing, cleaning, transformation, and exploratory data analysis on real-world datasets using Python, Pandas, NumPy, and visualization techniques to extract actionable insights. • Supported model-ready data preparation and reporting by analyzing trends, validating data quality, and presenting findings in a structured format to assist business and research decisions.	
Artificial Intelligence Intern - SkillDzire Technologies, Hyderabad	May 2025 – July 2025
• Developed machine learning and deep learning solutions, including disease prediction, sentiment analysis, and traffic sign recognition systems using Python, TensorFlow, Scikit-learn, OpenCV, and NLP techniques on real-world datasets. • Performed end-to-end data science workflows involving data preprocessing, feature engineering, exploratory data analysis (EDA), model training, and evaluation using Pandas, NumPy, and Matplotlib to generate actionable insights and improve model performance.	

PROJECTS:

Answer Evaluation System

- Developed an AI-powered Answer Evaluation System using Python, NLP, and Scikit-learn to assess descriptive answers through semantic similarity analysis, keyword matching, and machine learning-based text classification.
- Implemented automated score generation, text preprocessing, and database integration, reducing manual evaluation time by nearly 60% while improving accuracy, consistency, and scalability of response assessment.

Leave Management System

- Designed and developed a Leave Management System using React.js, Node.js/Flask, and MySQL/MongoDB to manage employee leave requests, approvals, attendance tracking, and secure record processing.
- Built REST APIs, authentication modules, and responsive dashboards to automate workflows, improve leave request processing efficiency by approximately 50%, and streamline approval operations.

EDUCATION:

Bachelor of Technology in Computer Science Engineering - Artificial Intelligence (Honors)

Chaitanya Bharathi Institute of Technology, Proddatur, Andhra Pradesh, India

CGPA: 8.02/10.0

Nov 2022 – April 2026

ACHIEVEMENTS & EXTRACURRICULAR:

- Secured 3rd place in Project Expo on Engineers Day
- Competed in multiple national-level hackathons, collaborating in fast-paced team environments to build and pitch full-stack AI and web applications under tight deadlines.
- Coordinated logistics, operations, and technical infrastructure as a core organizer for **AVINYA**, a 2-day national-level symposium attracting over 1200+ participants.
